

Kitchen Remodel

COST AND TIPS Remodeling can be as simple as a fresh coat of paint, or complex as a complete transformation. No matter the route, planning helps you avoid costly, surprising setbacks and keeps the project on time and on budget.

01

SET A BUDGET

New appliances and more square footage, or painted cabinets and a new fridge? Make the decision before you start. Don't forget budgeting for little details, like cabinet knobs.

02

COLOR & STYLE

Choose colors and materials that are cohesive with the design of the rest of the house.

03

MATERIALS, APPLIANCES, PERMITS

Source your materials, appliances and permits. Look into eco-friendly building materials and energy-efficient appliances. Purchase as much as possible or know the specifics.

06

TIMELINE

Don't order or replace cabinets until you know the dimensions of new appliances.

05

OBSTACLES

Will you need to reroute utilities? Will the new oven or fridge fit through the doorways? Do you have space to store materials and appliances until they're installed?

04

LOGISTICS

Check shipping periods. Make sure you'll get materials in time. Will the remodel require enough tear-out that you'll need to seal off other rooms? Where will you cook your meals and eat during the remodel?

COST BREAKDOWN

\$ <input type="checkbox"/> Cabinets	\$ <input type="checkbox"/> Faucet	\$ <input type="checkbox"/> Paint & Primer
\$ <input type="checkbox"/> Cabinet Hardware	\$ <input type="checkbox"/> Cabinet Knobs	\$ <input type="checkbox"/> Exhaust Fan
